Welcome Message

On behalf of the Organizing Committee, it is my great honor and pleasure to cordially invite you to the Korean International Semiconductor Conference on Manufacturing Technology 2023 (KISM 2023), which will be held at Busan, Korea from November 19 to 23, 2023.

With your devoted support, last year KISM 2022, the first international conference on semiconductors in Korea, was successful with the highest level of paper presentations and number of participants.

KISM 2023 will be a fundamental ground to exchange high-quality results and ideas provided by researchers and scientists from a variety of universities, industries, and research institutes. Furthermore, it also provides a conference to present the cutting-edge research outputs which would help both students and researchers with their future research studies and works to be conducted. Hence, individuals actively engaging in semiconductor manufacturing technology research and development are greatly encouraged to participate in the conference and gain academic insights they have desired.

This meeting will include prestigious Plenary Talks, Invited Talks, Regular Sessions (oral & poster presentations), and Exhibition. I hope you take this unique opportunity to present your recent research and development highlights, interact with your colleagues and peers, and have a memorable and rewarding experience at KISM 2023.

I do thank you for your participation and contributions in advance and look forward to seeing you in Busan, Korea.

Thank you very much.

Hyeongtag Jeon, Ph.D., Professor
General Chair of KISM 2023
Division of Materials Science & Engineering
College of Engineering
Hanyang University
