

Dr. Changbong Yeon

(Soulbrain Co., Ltd., Korea)

Dr. Changbong Yeon received the Ph. D. in the Department of Advanced Device Engineering from University of Science and Technology (UST), Korea in 2018. He has joined to Soulbrain R&D center for the development of thin film materials. He worked on the precursor development for high-temperature ALD for memory and display.

He is currently the principal researcher working on advanced deposition material such as growth inhibitors, growth activators, new reactants as well as new precursors.
