

Prof. Daewon Lee

(Myongji University, Korea)

Professor Daewon Lee obtained Bachelor of Engineering degree in Electrical Engineering from the University of Minnesota - Twin Cities in 2010. He embarked on his professional journey as a Researcher at the Korea Electronics Technology Institute (KETI) from October 2010 to June 2011, gaining valuable experience in the electronics industry. From Seoul National University, he received Ph.D. degree in Bioengineering in 2018. Following this, he continued his academic pursuits as a Postdoctoral Research Fellow at Seoul National University from September 2018 to August 2022.

In September 2022, Professor Lee assumed the position of Assistant Professor in the Department of Electronics Engineering at Myongji University. This appointment underscores his dedication to the education and cultivation of forthcoming engineers and scholars.

His research encompasses both fundamental and applied dimensions of nano and micro-scale fabrication, as well as the self-assembly of micro-electro devices and bio-particles for the development of uniquely scalable devices.
