Exhibitor Introduction	<p>WONIK IPS has contributed to the progress of semiconductor machinery industry in Korea.</p> <p>We succeeded in mass-producing ALD Systems in 1998 for the first time in the world and in 2004, we successfully developed and mass-produced CVD systems in semiconductor field.</p> <p>After that we also developed Dry-Etchers in Display and Organic/Inorganic deposition in PE-CVD. In 2014, we were successful in mass producing a mold process system, in 3D NAND Flash and in 2018, we successfully made inroads into the 10 Nanometer process DRAM High-K Market.</p> <p>Now we are hiring the one who makes our next generation in Semiconductor machinery industry. With talented Wonik people, we will further solidify our status as a global No. 1 manufacturer through ongoing R&D.</p>
